

SUGAR CANE RACETRACK

NO PLASTIC - 100% BIODEGRADABLE

Shell
V-Power

Made from 100% organic material

This racetrack is made from bagasse, a 100% biodegradable organic material and contains no additives or chemicals. Bagasse is the fibrous matter that remains after sugar cane stalks are crushed to extract their juice. This juice is the basis of ethanol, the world's leading biofuel.

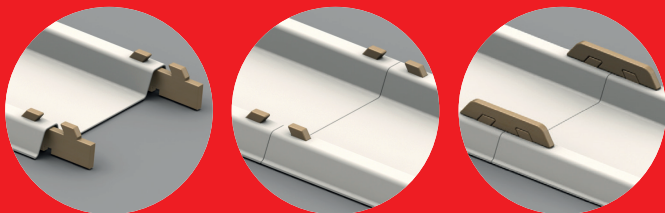

Your Sugar Cane Racetrack

With this set you can build a single-lane racetrack.

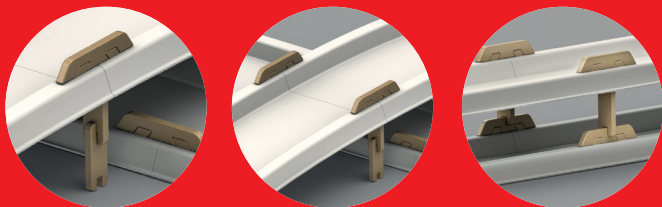

This is how you build your Sugar Cane Racetrack

1. Connect the track pieces using the wooden connectors.

2. Build bridges and overpasses using the 'H' connectors together with the track connectors.

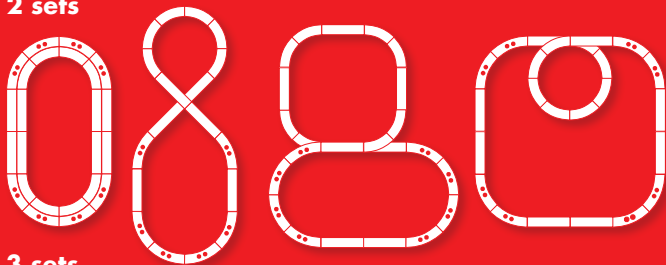

3. Fill your Salt Water Supercar and start racing.

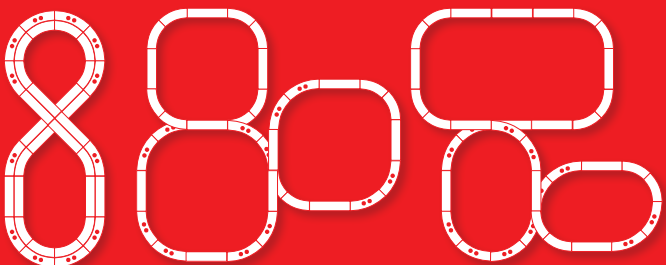

More tracks for more fun!

You can expand your track with as many sets as you like.

FABRICADA CON CAÑA DE AZÚCAR

PISTA DE CARRERAS

SIN PLÁSTICOS - 100% ORGÁNICA

Shell
V-Power

Fabricada con materiales 100% orgánicos

Esta pista de carreras está hecha de un material orgánico 100% biodegradable. Además, no contiene aditivos ni químicos. Este residuo de materia fibrosa es obtenido después de extraer el jugo de las cañas de azúcar.

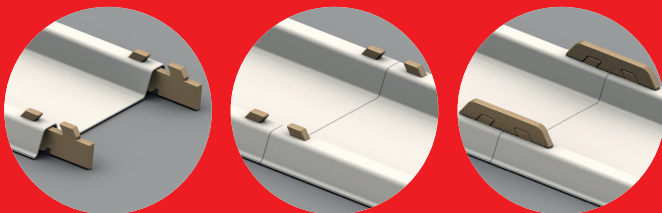

Tu Pista de Carreras de Caña de Azúcar

Con este kit puedes construir una pista de carreras de un solo carril.

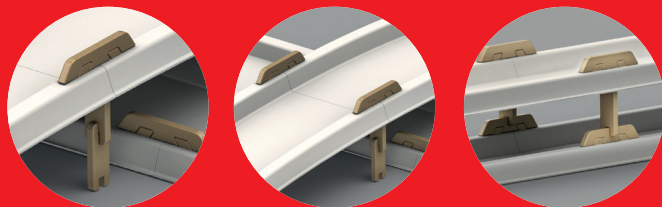

Instrucciones para construir tu Pista de Carreras de Caña de Azúcar

1. Une las piezas de la pista, con los conectores de madera.

2. Construye puentes y cruces elevados, utilizando los conectores en H junto con los conectores de la pista.

3. Recarga tu auto de agua más sal y empieza a correr.
